CAUTION

Precautionary Statements
Hazards to humans and domestic animals

CAUTION Harmful if swallowed. May cause eye irritation. Avoid contact with skin, eyes, or clothing. Wash thoroughly with soap and warm water after handling. Wash contaminated clothing with soap and hot water before reuse. Keep out of reach of children.

STATEMENTS OF PRACTICAL TREATMENT.

If in eyes, flush with plenty of water. Get medical attention if irritation persists. **If on skin,** wash with soap and hot water. **If swallowed,** call a physician or Poison Control Center. Give 1 or 2 glasses of water and induce vomiting by touching finger to back of throat. Do not induce vomiting or give anything by mouth to an unconscious or convulsing person. Get medical attention.

Physician Information: 30-3-8 Fertilizer with Oftanol is a cholinesterase inhibitor. Atropine and 2-PAM have been shown to be effective antidotes.

ENVIRONMENTAL HAZARDS.

This pesticide is toxic to fish and wildlife. Keep out of lakes, streams and ponds. Do not contaminate water by cleaning of equipment or disposal of wastes.

DIRECTIONS FOR USE.

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

STORAGE AND DISPOSAL

Storage: Do not store adjacent to or near proximity of foodstuffs, drugs, feeds or any other material intended for consumption by humans or animals. Do not store adjacent to toys, cosmetics, dishes, furniture or clothing. Do not store next to herbicides. Protect from rain and moisture. Store in a cool, well ventilated place. If bag is broken, sweep spilled product and place in application equipment or properly marked container.

Disposal: Do not contaminate water, food, or feed by storage or disposal. Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. Completely empty bag into application equipment. Then dispose of empty bag in a sanitary landfill or by incineration, or, if allowed by State and local authorities, by burning, if burned out of smoke.

RECOMMENDED APPLICATIONS

CROP	PEST	DOSAGE 30-3-8 WITH OFTANOL	REMARKS
Turf Grasses	SOIL INSECTS White grub larvae (such as Japanese beetle, Black turf grass ataenius, Chafers **Phyllophaga** spp. Green June beetle, Oriental beetle, Asiatic garden beetle) Billbug (larval stage) Hyperodes weevil (larval stage) Mole crickets	133 lbs./A* or 3 lbs./1000 sq. ft *Equivalent to 2 lbs. of Active Oftanol per acre and 0.9 lbs. of Actual Nitrogen per 1000 sq. ft	**Be Sure to Read "APPLICATION EQUIPMENT" Section of this label.** Do not apply more than 6 lbs. of 30-3-8 with Oftanol per 1000 sq. ft. per year or an equivalent amount of 1.45 ounces active ingredient per 1000 sq. ft. regardless of formulation used. Minimum interval between applications must be 30 days. **For White Grub and Billbug Larval Control:** Water turf area thoroughly immediately after application, using sufficient water to wet soil 1 to 1½" deep. **For Hyperodes Weevil Control:** Apply between full bloom periods of forsythia and flowering dogwood, usually April 15 to May 15, and water in as for white grub larval control. **For Mole Cricket Control:** Water immediately after application using ½ to 1 inch of water. Consult your local turf, State Agricultural Experiment Station or State Extension Service Specialists for more specific information regarding timing of application.
	SURFACE INSECTS Sod webworm larvae Chinch bug	1.5 or 3 lbs./1000 sq. ft 66 lbs./A* or 1.5 lbs./1000 sq. ft *Equivalent to 1 lbs. of Active Oftanol per acre and 0.45 lbs. of Actual Nitrogen per 1000 sq. ft For 3 lbs./1000 sq. ft. Same as SOIL INSECT DOSAGE above	Apply ½ to 1 inch of water immediately after treatment. Re-apply as necessary for pest re-infestation. Do not apply more than 6 lbs. 30-3-8 with Oftanol per 1000 sq. ft. per year or an equivalent amount of 1.45 ounces active ingredient per 1000 sq. ft. regardless of formulation used. Minimum interval between applications is 15 days for 1.5 rate and 30 days for the 3 lb. rate. 1.45 ounces active ingredient per 1000 sq. ft. regardless of formulation used. Minimum interval between application is 15 days for 1.5 rate and 30 days for the 3 lb. rate. Consult your local turf, State Agricultural Experiment Station, or State Extension Service Specialists for more specific information regarding timing of application.

DIRECTIONS

30-3-8 Fertilizer with Oftanol is recommended for use only by commercial applicators on commercial and residential turf including golf courses, cemeteries, sod farms, industrial grounds, parkways, and residential lawns. Do not apply more than 1.45 ounces active ingredient per 1000 sq. ft. per year.

APPLICATION EQUIPMENT

Apply 30-3-8 Fertilizer with Oftanol uniformly over the turf area with suitable granular turf application equipment. Both drop-type and rotary-type spreaders may be used to apply 30-3-8 Fertilizer with Oftanol. Avoid the use of spreaders which would apply the material in narrow, concentrated bands. For best results use turf equipment best designed to apply granular herbicides and insecticides to turf. Calibrate application equipment prior to use according to the manufacturer's directions. Check frequently to be sure equipment is working properly and distributing granules uniformly.

APPLICATION TECHNIQUES

30-3-8 Fertilizer with Oftanol application using a pull-type drop spreader can be aided by a splash board mounted under the hopper for more uniform granule distribution. Application using a tractor mounted or pull-type rotary applicator can be aided by using a seed application ring and a lime shield for more uniform granule distribution. A more uniform application can be made by spreading half the required amount of 30-3-8 Fertilizer with Oftanol over the area, and then immediately apply the remaining half at right angles or crosswise. The full recommended rate of 30-3-8 Fertilizer with Oftanol must be used for maximum benefit.

When applying 30-3-8 Fertilizer with Oftanol, use appropriate marking systems and make application when the wind is calm to prevent missed areas and water in after application.

***IMPORTANT:** These settings are only approximate. Age, condition of spreader, and operator speed can cause wide variation. Be sure to calibrate your spreader with each application.

RESTRICTIONS

Upon completion of the application, this material shall be watered in by the applicator with sufficient water to moisten the soil to a depth of 1 inch, **or**, the applicator shall instruct the owner of the property to water in with sufficient water to moisten the soil to a depth of 1 inch as soon as possible. Keep children and pets off the treated area until watering in has been completed and foliage has dried. Do not collect clippings at first mowing after application. Do not graze treated areas or use clippings from treated areas for feed or forage. Do not allow material to come in continuous contact with bare skin.

WARRANTY

LESCO warrants that this insecticide conforms to the chemical description on its label. When used in accordance with label directions under normal conditions, this insecticide is reasonably fit for its intended purposes. Since timing, method of application, weather, plant, and soil conditions, mixture with other chemicals, and other factors affecting the use of this product are beyond our control, no warranty is given concerning the use of this product contrary to label directions or under conditions which are abnormal or not reasonably forseeable. The user assumes all risks of any such use.

Boron	.04%
Iron	2.50%
Magnesium	1.50%
Manganese	.10%
Sulfur	4.00%
Zinc	.10%

Derived from Sulfur, Iron, Magnesium, Manganese and Zinc Glucoheptonate. Boron derived from Sodium Borate.

GENERAL RECOMMENDATIONS

For use in a balanced fertility program for all turfgrasses.

All Grasses (greens, tees, fairways, lawns): 1½ ounces ClawEl Turf Mix in 5 gallons water.
Ornamental Shrubbery: 2 quarts ClawEl Turf Mix in 62 gallons water.
Trees: 3 gallons ClawEl Turf Mix in 100 gallons water, spray to drip.
Potted Plants (nursery, etc.): 2 ounces ClawEl Turf Mix with 1 gallon water for every 10 sq. ft.

At least two applications are recommended, especially if clippings are removed. More frequent applications may be needed to correct deficiencies once they occur. For maintenance program throughout growing season, use ½ above amounts.

MIXING INSTRUCTIONS

1. Put 1/3 of water or fertilizer in tank
2. Add other chemicals, if any
3. Fill tank with balance of water or fertilizer
4. Add correct amount of CLAW-EL
5. Agitate adequately to mix

CAUTION: Check compatibility with orthophosphates, high potash suspensions, and chemical mixtures.

Seller warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use; but neither this warranty nor any other warranty of merchantability of fitness of a particular product expressed or implied, extends to the use of this product contrary to label instructions or under abnormal conditions, or under conditions not reasonably foreseeable to the seller; and buyer assumes the risk of any such use.

Manganese (Mn)	.50%	Mn. Oxide

Size

Medium – 8 + 16 56# cubic ft. A full weight, high density fertilizer.

Uses

This product is designed primarily for use on fairways. It is also excellent for tees, greens, and other areas where a high quality turf is desired. Suggested rates ½ – 1 pound Nitrogen per 1,000 sq. ft., during warm seasons and 1 – 2 pounds Nitrogen during cool seasons.

Coverage

Basis one pound Nitrogen per 1,000 sq. ft. – one application.

1,000 Sq. Ft.	Acre Rate	Ton Covers	1-Bag Covers	Average 18 Hole Course	
				Greens – 3 Acres	Fairways – 45 Acres
5.6#	245#	8.2 Acres	9,000 Sq. Ft.	.37 Tons	5.51 Tons

Features

1. A homogenous granular turf fertilizer containing 5.5 units WIN (50% Organic Nitrogen).
2. A premium product formulated to give fast green-up and sustained feeding. An imbalance of nutrients usually favors disease development.
3. Granules sized for fairway use for fast and effective spreading with either spinner or drop type spreaders.
4. 100% sulfate of potash – provides increased summer durability both from the stand-point of traffic and disease resistance and increases winter hardiness.
5. Formulated with magnesium to help prevent deficiencies on acid sandy soils and to balance the potash required for good rich turf.
6. Rich in sulfur to help develop dark green turf, increasingly important under higher fertilization rates, sandy soils and less sulfur from the atmosphere. Sulfur balances the nitrogen program to insure dark green growth.
7. Iron added to enhance green color on high alkaline soils, especially on irrigated turf areas.
8. Enriched with manganese to insure an adequate soil supply even at high pH levels and accentuated by cool wet conditions. At the ideal 2:1 iron to manganese ratio.

E.P.A. Reg. No. 961-310

Size

Medium - 8 + 16 — 58# cubic ft. — A full weight, high density fertilizer.

Uses

Prevents the germination of crabgrass, poa annua, foxtail, and certain other annual weeds, and fertilizes turf in one easy application.

Coverage

1,000 Sq. Ft.	Acre Rate	Ton Covers	1-Bag Covers	Average 18 Hole Course Fairways - 45 Acres
5#(.9#N)	218#(10.6#AI)	9.2 Acres	10,000 Sq. Ft.	4.9 Tons (477#AI)

Features

1. Saves time and dollars - does two jobs at once.
2. The fertilizer base is economical Country Club 19-4-6 - 25% Org. for longer feeding.
3. Where seeding is necessary, there should be a delay of approximately 60 days after application.
4. Do Not apply to dichondra.
5. Use in early Spring before crabgrass and other annual weeds germinate.
6. Rake turf to remove debris. Do not rake after application. Apply with spreader at the rate of 5 pounds per 1,000 sq. ft. (50 lbs./10,000 sq. ft.) which equals .95 pounds Nitrogen per 1,000 sq. ft. or 10.6 pounds active **Dacthal** per acre.

Insecticide Content

Isofenfos (Oftanol) 1.25%

E.P.A. Reg. No. 3125-350-961

Uses

Country Club 19-4-6 With Oftanol is recommended for use on golf courses, lawns and other ornamental and recreational turfgrass areas. Controls white grub larvae, billbug (larval stage), hyperodes weevil (larval stage), and mole crickets in the soil's subsurface. Also controls sod webworm and chinch bug on the soil surface.

Coverage

	1,000 Sq. Ft.	
Soil Insects	3⅓#	Water-in immediately to wet soil 1-1½ inches deep without causing runoff. (For mole crickets - wet soil ½-1 inches if rainfall does not occur.) One bag covers 11,000 sq. ft.
Surface Insects	1 lb. 14 oz. or 3⅓#	Apply ¼-½ inch water immediately after treatment. One bag covers 11,000-22,000 sq. ft.

Features

1. Contains fertilizer and insecticide to do two jobs in one application - thus saving time and money.
2. The fertilizer base is a premium balanced 19-4-6 fertilizer for today's high quality turf requirements.
3. Offers season-long grub control when used at proper rates with little effect on earthworm populations.
4. **Oftanol** has a low solubility and resists leaching when the material is distributed into the soil.
5. Excellent in a wide range of soil pH conditions.
6. For best results water-in immediately after application at rates recommended on label.

Size

Medium - 8 + 16 58# cubic foot. A full weight, high density fertilizer.

Uses

This product is designed for use as a starter fertilizer. Recommended on plantings such as flower buds, ornamentals, trees, etc., it is also excellent to use in low phosphate turf areas. Work into the soil prior to seeding at the rate of 200-400 pounds per acre.

Coverage

Basis ½ pound Nitrogen per 1,000 sq. ft. - one pound Phosphorus per 1,000 sq. ft. - one application.

Features

1. A granular fertilizer with an ideal 1-2-1 ratio.
2. High in phosphorus to promote seedling establishments and flowers.
3. Excellent to use when soil reports show low phosphorus levels. Using a balanced fertilizer increases efficiency of nutrient uptake.
4. Sulfur and iron added to increase green turf color.
5. Develops flowers that are large, vigorous, and rich in color - a grade high in phosphorus such as 13-25-12 is essential for this flowering process.
6. An ideal fall fertilizer - winterizer where low nutrient levels exist.

Manganese (Mn)	0.50%	Mn. Oxide
Iron (Fe)	1.00%	Ferrous Sul.

Size Medium - 9 + 16 56# cubic ft. A full weight, high density fertilizer.

Uses This product is designed for use where the need for potash is high or where turfgrass feeding is done with specialized Nitrogen products. The best time to use is in the late Fall or early Spring at the ½ pound Nitrogen level. This supplies 1½ pounds of Potash per 1,000 sq. ft.

Coverage Basis pound Nitrogen per 1,000 sq. ft. - one application.

1,000 Sq. Ft.	Acre Rate	Ton Covers	1-Bag Covers	Average 18 Hole Course	
				Greens - 3 Acres	Fairways - 45 Acres
6.25#	273#	7.3 Acres	8,000 Sq. Ft.	.41 Tons	6.13 Tons

Features

1. A high potash ratio designed for use where soil potash levels are low. Ideal for late fall application where a high potash grade is needed to help improve winter hardiness or spring applications where sandy soil textures won't hold potash.
2. Excellent for use with turfgrass feeding programs that include specialized nitrogen products.
3. All potash is from sulfate of potash to reduce high chlorine levels.
4. Iron added to help produce a greener thicker turf.
5. Contains sulfur to help balance the nitrogen program for a dark green turf.
6. A complete fertilizer designed to grow good turf while building potash levels and not affecting soil phosphorus levels.
7. An ideal product to use in low potash situations to help create balanced feeding and not luxury feeding as usually occurs with heavy potash applications.

5.6#	245#	8.2 Acres	9,000 Sq. Ft.	.37 Tons	5.51 Tons

Features

1. A homogenous granular non-burning type fertilizer - 90% Organic Nitrogen, 10.0 units WIN. A balanced ratio for sustained feeding. An imbalance of nutrients usually favors disease development.
2. Specially sized for use on greens and tees for rapid penetration into the root and less pick-up by the greens mowers.
3. Excellent to use where phosphorus is high from repeated applications.
4. Sulfate of potash provides increased summer durability both from the traffic and disease resistance standpoint and increased winter hardiness.
5. An acid formulation to help hold down pH buildup in greens and tees.
6. Contains magnesium to help prevent deficiencies on sandy acid soils and to balance the potash required for good, rich turf.
7. High in sulfur to help produce a dark green turf-increasingly important with high fertilization rates, sandy soils and less sulfur pollution in the atmosphere.
8. Sulfur balances the nitrogen program to insure luxurious green turf, especially important where clippings are removed.
9. Iron added to enhance rich green color on high lime areas. Especially beneficial on greens made from course sand and acid peat.
10. Contains manganese to insure an adequate soil supply even at high organic matter and pH levels - accentuated by cool wet conditions. Formulated at ideal 2:1 iron to manganese ratio.

GENERAL RECOMMENDATIONS

For use in a balanced fertility program for all turfgrasses.

All Grasses (greens, tees, fairways, lawns): 1½ ounces ClawEl Turf Mix in 5 gallons water.
Ornamental Shrubbery: 2 quarts ClawEl Turf Mix in 62 gallons water.
Trees: 3 gallons ClawEl Turf Mix in 100 gallons water, spray to drip.
Potted Plants (nursery, etc.): 2 ounces ClawEl Turf Mix with 1 gallon water for every 10 sq. ft.

At least two applications are recommended, especially if clippings are removed. More frequent applications may be needed to correct deficiencies once they occur. For maintenance program throughout growing season, use ½ above amounts.

MIXING INSTRUCTIONS

1. Put 1/3 of water or fertilizer in tank
2. Add other chemicals, if any
3. Fill tank with balance of water or fertilizer
4. Add correct amount of CLAW-EL
5. Agitate adequately to mix

CAUTION: Check compatibility with orthophosphates, high potash suspensions, and chemical mixtures.

Seller warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use; but neither this warranty nor any other warranty of merchantability of fitness of a particular product expressed or implied, extends to the use of this product contrary to label instructions or under abnormal conditions, or under conditions not reasonably foreseeable to the seller; and buyer assumes the risk of any such use.
